

A1Immuno

Instructions

Administer to pregnant, nursing women or children under 3 only after consulting a physician.

No milk or orange juice and preferably no food 30 minutes before or after ingestion.

Doses (1 vial 30ML=1Fl oz):

Child over 3 ½ dose per day, if necessary

Normal size adult 1 dose per day, if necessary

Large adult 2 doses per day, if necessary

Positive test result: 2 immediately – 1 before bed – 1 following morning.

Repeat if necessary

Improvements should be felt within 6-8 hours

Shake well!

Unless emergency do not eat 30 mins before and after taking Electroicide.

Try not to drink milk or orange juice while taking Electroicide.

The effect is almost immediate, and all symptoms should be gone in 4-6 hours or overnight.

In some case one more vial is needed the following day.

No negative effect if taken with medications.

No effect on gut flora. Only on pathogens.

Relief of knee and other pain, pneumonia, diverse infections, kidney stones, shingles, and other infectious diseases may occur.

Doses can be administered regardless of stage of symptoms.

Not sensitive to heat fluctuations and does not need to be refrigerated.

NO ADVERSE side effects.

Adding 1/4 teaspoon of raw sugar per dose increases the efficacy.

Unlimited Shelf-life

Can be used as prophylactic.

No known side effects. If taken in very large amounts some nausea may occur. Can be taken with any frequency per day 1 dose at a time.

Note: If you test positive, you have to change your toothbrush, bed and pillow sheets after taking Electroicide.

Now take more dosage to eliminate COVID infection, is that newer variants have progressively increased a patient's viral load. The Delta variant can produce 1,260 times the viral load of the original SARS-CoV-2 (see link to study) There is a large, but finite number, of structured mineral particles in Solution 4 USA current single serving. Each particle must come into proximity with an individual virus to disable it. If you have 1,260 times more viruses to disable, you need more particles and / or time. Higher Solution 4 USA dosages will be required. Some suggestions: swish in mouth 20 seconds before swallowing, double dose if over 200 lbs., Increase frequency and amount until after symptoms are not detectable.

Under 150lbs over 150lbs increased dosage

Stage 1

1 Electroside AM and 1 in PM

A drop of TEW in every drink

Stage 2

2 Electroside AM and 2 in PM

A drop of TEW in every drink

Detox

5 Perfect Amino acids AM and 5 PM

Stage 3 -5

2 Electroside AM and 2 in PM

A drop of TEW in every drink

Detox

5 Perfect Amino acids AM and 5 PM

Adjust times per day depending on person weight and progress
